**Does this describe your old outdated copier?**

**Slow, Unreliable, Poor copy quality, Irritating, Expensive to operate and maintain. Broken more than it works? More than 7 years old? Too Many Copies to Count?**

**It's ok, we've got you covered!**

Replacing that old outdated, inefficient copier is one of the best investments today's leaner run businesses can make. Today's MFP's (Multi functional Products) may have seemed out of reach but with the advanced cost saving features of Ricoh's Digital Copiers, it's a reality. With features such as scanning, printing and faxing, upgrading your current system now, will reduce costs of operation. Moving your printed pages and faxes from conventional systems normally generates enough savings to cover the upgrades and starts paying YOU back. The majority of our customers benefit from a decrease in overall spending with a properly configured system, acquisition plan and document management workflow.

You can now acquire a new or off lease system with lower total cost of ownership than that of analog or older digital systems. Innovative black & color MFP digital systems provide high speed, superior image quality and simplified operations. Incredible leasing arrangements make it affordable to have the advantages of a new digital system for your business today.

**Call us** to learn more. We will be happy to review your needs and determine which of the Ricoh new MFP systems fits into the workflows of your business and into your budget.
